## Young Plants

Every farmer knows that some plants grow better than others. Soil may be the same and seed may seem the same but some plants are weak and others strong. And that's the way with children. They are like young plants. Same food, same home, same care but some grow big and strong while others stay small and weak. Scott's Emulsion offers an easy way out of the difficulty. Child weakness often means starvation, not because of lack of food, but because the food does not feed. Scott's Emulsion really feeds and gives the child growing strength. Whatever the cause of weakness and failure to grow—Scott's Emulsion seems to find it and set the matter right.
